

Carbon Reduction Plan

2024

Supplier Name: Bedroq Limited

Publication Date: 15/11/2024

Commitment to achieving Net Zero

Bedroq Limited is committed to achieving Net Zero emissions by 2030.

Baseline Emissions Footprint

Baseline Year: 2022 (1/01/2022 – 31/12/2022)		
<p>Our Carbon Emissions in 2022 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol. In order to manage and streamline our supply chain, we have ensured that upstream and downstream transportation and distribution emissions are measured year on year and included in our scope 3. We have also measured our Business Travel and Employee Commuting as part of our Scope 3 emissions. The Government issued emissions factors have been used to calculate the CO2e for each source.</p>		
Baseline year emissions:		
EMISSIONS	TOTAL (tCO2e)	
Scope 1	3.3	
Scope 2	8.6	
Scope 3	68.5	
Included Sources	Business Travel	41.8
	Employee Commuting	0.7
	Transportation and distribution	7.3
	Homeworker emissions	10.8
Total Emissions	80.4	

Current Emissions Reporting

Reporting Year: FY 2024 (01/04/2023 – 31/03/2024)

Our Carbon Emissions in FY2024 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol. In order to manage and streamline our supply chain, we have ensured that transportation and distribution emissions are measured year on year and included in our scope 3. We have also measured our Business Travel and Employee Commuting as part of our Scope 3 emissions.

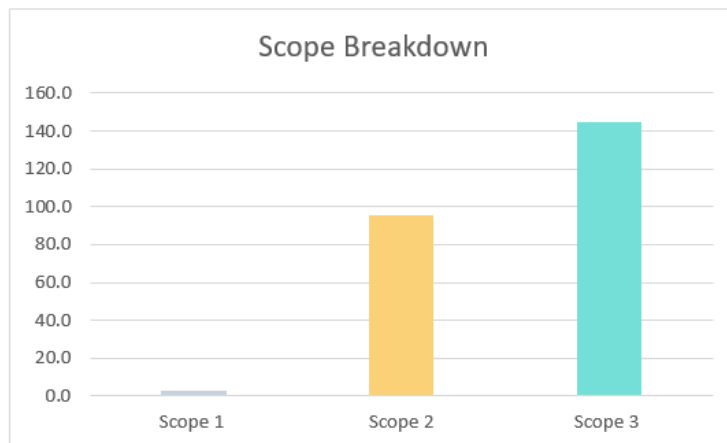

We operate a distributed workforce, with 90% of our employees working from home and the remaining 10% working from our office. As part of our 2024 reporting, we have included homemaker electricity and gas emissions as part of our Scope 3 emissions. The Government issued emissions factors have been used to calculate the CO2e for each source.

This year has seen a significant rise in complex customer projects which required large amounts of equipment to be shipped to our offices and setup on site. This has led to a large increase in our electricity requirements as well as transportation.

Our business travel has risen due to an increase in face-to-face meetings with customers, as well as visits between UK staff and our team in Manila.

Current year emissions:

EMISSIONS	TOTAL (tCO2e)	
Scope 1	2.6	
Scope 2	95.6	
Scope 3	144.7	
Included Sources	Office emissions (electricity)	95.6
	Business Travel	96.4
	Employee Commuting	0.7
	Transportation and distribution	34
	Homeworker emissions	2.5
Total Emissions	242.88	

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next five years to 18.00 tCO₂e by 2026. This is a reduction of 22.28%

Carbon Reduction Projects

We pride ourselves on being an environmentally conscious company. We support two Gold Standard projects: [Ceará Renewable Energy Project \(Brazil\)](#) and [The Nicaforest High Impact Reforestation Programme \(Nicaragua\)](#). Gold Standard Projects are verified to contribute to at least three of the United Nation's Sustainable Development Goals. Through investment in carbon credits from these projects we have offset 300 tonnes CO₂e, surpassing our goal of net-zero emissions.

Our investment ensures the longevity and expansion of these projects, enabling further carbon reductions, project scaling and efficiencies, as well as numerous benefits to the local communities – food and water security, biodiversity conservation, quality education, creation of hundreds of jobs, and increased community resilience.

In order to reduce emissions, we target manageable sources such as emissions released from purchased electricity in our scope 2. As we work to identify the key contributors to our emissions in Scope 3, we will reassess our supply chain to ensure all unnecessary travel is cut down in both upstream and downstream transportation and distribution.

We are ISO 14001:2015 certified and have an effective environmental management strategy in place. Some areas we have targeted include:

- Ensuring all lighting is fitted with LED bulbs
- All rooms are fitted with sensors to prevent unnecessary electricity consumption
- No print policy.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of the Supplier:

Date: 15th November 2024
